Tranceformers: Shamans of the 21st Century is the true story of this author's contact with a "dead" optics physicist colleague and the telepathic communication that sent him searching for scientific answers to his spiritual questions. Harper draws from this deep well of wisdom: astrology, biology, near-death experiences, paranormal psychology, quantum physics as well as Egyptian and Mayan cosmology overall. He does an excellent job of synthesizing massive amounts of information, making this shift of the ages comprehensible to the general reader. Clearly this is a necessary primer to understand the coming apocalypse of biblical proportions in consciousness, climate, culture, and civilization. However, the theme of this book is that by learning to use trance- the techniques employed by mystics, prophets, and shamans- one can unlock the mysteries of existence for themselves. Indeed this is the big idea behind the Eternal Return of the Sun of God in 2012: Self-Empowerment.
The Biology of Belief: Unleashing the Power of Consciousness, Matter & Miracles (2005, updated for 10th anniversary in 2015) by cell biologist Bruce Lipton explores the power of the mind to influence health and well being. In this life-changing book, Dr. Herbert Benson draws on his twenty-five years as a physician and researcher to reveal how affirming beliefs, particularly belief in a higher power, make an important contribution to our physical health. We are not simply nourished by meditation and prayer, but are, in essence, "wired for God." Combining the wisdom of modern medicine and of age-old faith. Dr. Benson shows how anyone can, with the aid of a caring physician or healer, use their beliefs and other self-care methods to heal over 60 percent of medical problems. As practical as it is spiritual, Timeless Healing is a blueprint for healing and transforming your life.

Dear Reader, I am honored that you have picked up The True Power of Water. In a world of no mistakes, it is not by coincidence that you and I are embarking on this journey. The words and pictures you are about to see will open a new world of possibilities for you -- just as my research has done for me. In this book you will learn of the unique properties of water and its ability to improve your health and your life. You will see the effect each of us has on water -- not only the water we drink but also the water that makes up 70 percent of the human body and, most importantly, what happens to that water as we interact with each other. 2005 marks the beginning of the United Nations Decade of Water. It is our individual responsibility to learn all we can about water, the most precious resource on our planet, and to help shift the consciousness through our thoughts, through our words and prayers, and through our commitment to respect each other with love and gratitude. May our understanding of water help bring peace to all humankind. Masaru Emoto
"A big, bold, brilliantly crafted page-turner with HUGE ideas that challenge every last view about how the world works. This is both a primer to understand the law of attraction and the essential book of our age." — Jack Canfield, author of The Success Principles(TM) and featured teacher on The Secret(TM)  "One of the most powerful and enlightening books I have ever read. A magnificent job of presenting the hard evidence for what spiritual masters have been telling us for centuries." — Wayne W. Dyer  During the past few years science and medicine have been converging with common sense, confirming a widespread belief that everything—especially the mind and the body—is far more connected than traditional physics ever allowed. The Field establishes a new biological paradigm: it proves that our body extends electromagnetically beyond ourselves and our physical body. It is within this field that we can find a remarkable new way of looking at health, sickness, memory, will, creativity, intuition, the soul, consciousness, and spirituality. The Field helps to bridge the gap that has opened up between mind and matter, between us and the cosmos. Original, well researched, and well documented by distinguished sources, this is the mind/body book for a new millennium.

The Biology of Belief and Healing
In Subud the Coming New Age of Reality, author Simon Monbaron, a self-proclaimed Subud "zealot", shares the knowledge, wisdom and experience he has gained from forty years of receiving the spiritual training known as the "latihan kejiwaan" of Subud. This massive (594 pages) tome is not just for Subud members, but for anyone who seeks the reality that lies beyond the material world. At last, here is a book I can give to friends and family members who are curious about what I do when I go off to receive the latihan, but are not yet ready to jump into the deep end to find out for themselves! For the merely curious, Monbaron's book recounts the history of Subud, and how it grew from a small group in Indonesia to a world-wide spiritual phenomenon. It tells the story of Muhammad Subuh Sumohadiwidjojo, an unremarkable government clerk whose life changed when a ball of light entered the top of his head when he was out for an evening stroll. And it discusses many aspects of the latihan, which is the central core of Subud. For those who are considering joining Subud, the Monbaron's book provides information regarding what this involves, as well as a detailed description of the Subud organization. Readers may also skip around and find out what Bapak had to say about topics as varied as suicide, feminism, reincarnation, sex, drug use, and many other questions
and issues with which people struggle. Whether you use it as a reference manual, a source of fascinating anecdotes and spiritual insights, or a way to learn about a spiritual path of profound power and simplicity, Subud the Coming New Age of Reality is a treasure chest of immense value.

What would it mean to discover that everything from the DNA of life, to the future of our world, is based upon a simple Reality Code—one that we can change and upgrade by choice? New revelations in physics and biology suggest that we’re about to find out! A growing body of scientific evidence suggests that our universe works like a Consciousness Computer. Rather than the number codes of typical software, our Consciousness Computer uses a language that we all have, yet are only beginning to understand. Life’s reality code is based in the language of human emotion and focused belief. Knowing that belief is our reality-maker, the way we think of ourselves and our world is now more important than ever! For us to change the beliefs that have led to war, disease, and the failed careers and relationships of our past we need a reason to see things differently. Our ancestors used miracles to change what they believed. Today we use science. The Spontaneous Healing of Belief offers us both: the miracles that open the door to a powerful new way of seeing the world, and the science that tells us why the miracles are possible, revealing: why we are not limited by the "laws" of physics and biology as we know them today. Once we become aware of the paradigm-shattering discoveries and true-life miracles, we must think of ourselves differently. And that difference is where the spontaneous healing of belief begins.

Here is a book that every student and teacher of the combat arts will want to have in their personal library. There has never been a book about the combat arts as unique as this one. If you would love to know the basic tactical principles of some of the world's most effective fighting and combat systems this book is for you. There are more than 30 different arts and their tactical principles in this book. This is a manual you will refer to often as an excellent reference source on tactical principles.

Why do we feel the way we feel? How do our thoughts and emotions affect our health? Are our bodies and minds distinct from each other or do they function together as parts of an interconnected system? In her groundbreaking book Molecules of Emotion, Candace Pert provides startling and decisive answers to these and other challenging questions that scientists and philosophers have pondered for centuries. Her pioneering research on how the chemicals inside our bodies form a dynamic information network, linking mind and body, is not only provocative, it is revolutionary. By establishing the biomolecular basis for our emotions and explaining these new scientific developments in a clear and accessible way, Pert empowers us to understand ourselves, our feelings, and the connection between our minds and our bodies -- body-minds -- in ways we could never possibly have imagined before.
Molecules of Emotion is a landmark work, full of insight and wisdom and possessing that rare power to change the way we see the world and ourselves.

Magical Child, a classic work, profoundly questioned the current thinking on childbirth practices, parenting, and educating our children. Now its daring ideas about how Western society is damaging our children, and how we can better nurture them and ourselves, ring truer than ever. From the very instant of birth, says Joseph Chilton Pearce, the human child has only one concern: to learn all that there is to learn about the world. This planet is the child's playground, and nothing should interfere with a child's play. Raised this way, the Magical Child is a happy genius, capable of anything, equipped to fulfill his amazing potential. Expanding on the ideas of internationally acclaimed child psychologist Jean Piaget, Pearce traces the growth of the mind-brain from birth to adulthood. He connects the alarming rise in autism, hyperkinetic behavior, childhood schizophrenia, and adolescent suicide to the all too common errors we make in raising and educating our children. Then he shows how we can restore the astonishing wealth of creative intelligence that is the birthright of every human being. Pearce challenged all our notions about child rearing, and in the process challenges us to re-examine ourselves. Pearce's message is simple: it is never too late to play, for we are all Magical Children.

This 10th-anniversary edition of Bruce Lipton's best-selling book The Biology of Belief has been updated to bolster the book’s central premise with the latest scientific discoveries—and there have been a lot in the last decade. The Biology of Belief is a groundbreaking work in the field of new biology. Former medical school professor and research scientist Bruce H. Lipton, Ph.D., presents his experiments, and those of other leading-edge scientists, which examine in great detail the mechanisms by which cells receive and process information. The implications of this research radically change our understanding of life, showing that genes and DNA do not control our biology; instead, DNA is controlled by signals from outside the cell, including the energetic messages emanating from our positive and negative thoughts. This profoundly hopeful synthesis of the latest and best research in cell biology and quantum physics has been hailed as a major breakthrough, showing that our bodies can be changed as we retrain our thinking.

Provine boldly goes where other scientists seldom tread—in search of hiccups, coughs, yawns, sneezes, and other lowly, undignified, human behaviors. Our earthiest instinctive acts bear the imprint of our evolutionary origins and can be valuable tools for understanding how the human brain works and what makes us different from other species.

SUMMARY - The Biology Of Belief: Unleashing The Power Of Consciousness, Matter Miracles By Bruce H. Lipton
Author Lipton is a former medical school professor and research scientist. His experiments, and those of other leading-edge scientists, have examined in great detail the processes by which cells receive information. The implications of this research radically change our understanding of life. It shows that genes and DNA do not control our biology; that instead DNA is controlled by signals from outside the cell, including the energetic messages emanating from our positive and negative thoughts. Dr. Lipton's profoundly hopeful synthesis of the latest and best research in cell biology and quantum physics is being hailed as a breakthrough, showing that our bodies can be changed as we retrain our thinking.

Radical changes are afoot in medicine as we build stronger bridges between science and spirituality. In CONSCIOUS MEDICINE Gill Edwards explains that mind and body are inseparable and that emotions are crucial in health and disease. Her new approach to healthcare is based on the latest research into the transformative power of consciousness, energy and the bodymind. She explains how, when you break your old habits of thought, you can not only reverse disease processes and heal injuries but also attract more positive events and circumstances into your life. Chapters cover 'miracles' in health and why our current medical model is limiting, how negative thoughts activate the stress response in the body which eventually makes us ill, how the body speaks to us symbolically through symptoms and illness, how to break free from limiting patterns and create a new health-full future. Always thought-provoking and inspiring, this is an accessible, practical and joyous book.

In this “riveting read, meshing memoir with scientific explication” (Nature), a world-renowned neuroscientist reveals how he learned to communicate with patients in vegetative or “gray zone” states and, more importantly, he explains what those interactions tell us about the working of our own brains. “Vivid, emotional, and thought-provoking” (Publishers Weekly), Into the Gray Zone takes readers to the edge of a dazzling, humbling frontier in our understanding of the brain: the so-called “gray zone” between full consciousness and brain death. People in this middle place have sustained traumatic brain injuries or are the victims of stroke or degenerative diseases, such as Alzheimer’s and Parkinson’s. Many are oblivious to the outside world, and their doctors believe they are incapable of thought. But a sizeable number—as many as twenty percent—are experiencing something different: intact minds adrift deep within damaged brains and bodies. An expert in the field, Adrian Owen led a team that, in 2006, discovered this lost population and made medical history. Scientists, physicians, and philosophers have only just begun to grapple with the implications. Following Owen’s journey of exciting medical discovery, Into the Gray Zone asks some tough and terrifying questions, such as: What is life like for these patients? What can their families and friends do to help them? What are the ethical implications for religious organizations, politicians, the Right to Die movement, and even insurers? And perhaps most intriguing of all: in defining what a life worth living is, are we too concerned with the physical and not giving enough emphasis to the power of thought? What, truly, defines a satisfying life? “Strangely uplifting…the testimonies of people who have returned from the gray zone evoke the mysteries of consciousness and identity with tremendous power” (The New Yorker). This book is about the difference between a brain and a mind, a body and a person. Into the Gray Zone is “a fascinating memoir…reads like a thriller” (Mail on Sunday).

This book clearly explains the biochemical and biophysical process by which the human mind can influence the human body. This book brings out the reality how the disorders and diseases of human body are generated from the human mind. This book is completely
capable of exposing how the human emotions and thoughts can influence the human DNA and also explains how our positive and negative emotions affect the physiology of cells of our body differently. This book clearly reveals how the psychology of the human mind can directly affect the human physiology at macroscopic and microscopic levels in the human body. It also specifically rules out how environment can affect the mind and the cells of the human body. It gives a clear cut concept on the role of perception, beliefs, and emotions in determining the health and disease of the cell. And explains how the perception, beliefs, and emotions of an individual affect the functioning of the cells in his body. This book rules out the existence of consciousness that brings life into existence in the human body. It also exposes the role of heart in becoming the seat of emotions and also projects out the truth that how the human heart can generate the strongest electromagnetic fields that can influence the functioning of each and every cells of human body. It also explains how these fields can be used to heal physical diseases and disorders. This book also exposes how the human gut can control the brain and emotions. It also explains the role of gut in creating health. This book put forth the secrets of the two independent organs in the human body that can control the human brain and that can create a powerful health in the human body. This book also introduces the role of electromagnetic fields in the creation of human body and how this field works in functioning of human body at subatomic level. This book exposes the quantum mechanical interaction of molecules in the human body which can clearly explain how the consciousness and mind can influence the DNA molecules independent of time and space. This book also explains how carbohydrates, amino acids, vitamins, and other fats are essential for the generation of positive health by increasing the raw material for the manufacturing of mood elevating neurotransmitters, neuropeptides, and neurohormones in the brain.

After her third cancer diagnosis in three years, Leigh Fortson was given few options by her doctors and little hope for a bright future. For weeks, she mourned the life she thought she was losing—until she was introduced to an idea that changed everything: our thoughts and emotions influence every cell in our body. This revelation gave her the hope that would begin her journey to becoming cancer-free and more joyful than she had ever been before. Embrace, Release, Heal shares her inspirational story and the fruits of her research in one empowering book. Created to help anyone whose life has been affected by cancer, this in-depth resource offers interviews with both allopathic and integrative medical experts; remarkable accounts from people who transcended "terminal cancer" and are now thriving, snapshots of progressive treatment techniques; and insights into other key factors that can affect well-being—including thoughts, emotions, and diet.

Unleashing the power of consciousness, matter and miracles It has been ten years since the publication of The Biology of Belief, Bruce Lipton’s seminal book on the relationship between mind and body that changed the way we think about our lives, our health, and our planet. During that time, research in this field has grown exponentially – Lipton’s groundbreaking experiments have now been endorsed by more than a decade of rigorous scientific study. In this greatly expanded edition, Lipton, a former medical school professor and research scientist, explores his own experiments and those of other leading-edge scientists that have unraveled in ever greater detail how truly connected the mind, body, and spirit are. It is now widely recognized that genes and DNA do not control our biology. Instead, they are controlled by signals from outside the cell, including energetic messages emanating from our thoughts. In her New York Times bestseller, Radical Remission: Surviving Cancer Against All Odds, Dr. Kelly A. Turner, founder of the Radical Remission Project, uncovers nine factors that can lead to a spontaneous remission from cancer even after conventional medicine has failed. While getting her Ph.D. at the University of California, Berkley, Dr. Turner, a researcher, lecturer, and counselor in integrative oncology, was shocked to discover that no one was studying episodes of radical (or unexpected) remission when people recover against all odds without the help of conventional medicine, or after conventional medicine has failed. She was so fascinated by this kind of remission that she embarked on a ten month trip around the world, traveling to ten different countries to interview fifty holistic healers and twenty radical remission cancer survivors about their healing practices and techniques. Her research continued by interviewing over 100 Radical Remission survivors and studying over 1000 of these cases. Her evidence presents nine common themes that she believes may help even terminal patients turn their lives around.

Toss Out Those Tired Old Excuses...Once and for All! Within the pages of this transformational book, Dr. Wayne W. Dyer reveals how to change the self-defeating thinking patterns that have prevented you from living at the highest levels of success, happiness, and health. Even though you may know what to think, actually changing those thinking habits that have been with you since childhood might be somewhat challenging. If I changed, it would create family dramas ... I'm too old or too young ... I'm far too busy and tired ... I can't afford the things I truly want ... It would be very difficult for me to do anything differently ... and I've always been this way ... may all seem to be true, but they're in fact just excuses. So the business of modifying habituated thinking patterns...
What would it mean to discover an ancient language—a literal message—hidden within the DNA of life itself? What we once believed of our past is about to change. . . . A coded message has been found within the molecules of life, deep within the DNA in each cell of our bodies. Through a remarkable discovery linking Biblical alphabets to our genetic code, the "language of life" may now be read as the ancient letters of a timeless message. Regardless of race, religion, heritage, or lifestyle, the message is the same in each cell of every woman, child, and man, past and present. Sharing all-new, fascinating research, Gregg Braden discusses the life-changing discovery that led him from a successful career in the aerospace and defense industries to an extensive 12-year study of the most sacred and honored traditions of humankind.

How do we access the authentic self in order to live fulfilling, meaningful lives? In straightforward terms, The Heart of the Matter: Gifts in Strange Wrapping Paper explains a simple but extraordinarily powerful technique called the See, Feel, Hear Challenge that enables people to easily gain entry into the storehouse of their subconscious core beliefs. In the process, it cracks the coded messages that those beliefs release in the form of disease, suffering, addictions, unhappy relationships, and victimized circumstances. Based in the latest findings in neuroscience and neurocardiology, this book guides readers to an uncomplicated understanding of the astounding power of our emotions and how life automatically delivers experiences that trigger negative reactions that subconsciously impact us. These
emotions form the foundation of core beliefs that create unhealthy attitudes and dis-ease patterns that keep us from experiencing the authentic, satisfying lives we desire. Using clear examples and true stories from clients, Dr. Weissman’s latest work demonstrates how we can release these stored emotions and their wisdom via the See, Feel, Hear Challenge. It then explains how to use this simple method to evoke feelings that positively impact the quantum field, remolding our bodies, minds, and everyday lives into purposeful expressions of inner joy and radiant well-being. Whether you’re dealing with addictions, dysfunctional relationships, or illness, or are focused on becoming an Olympic champion, The Heart of the Matter gives you a potent tool for positive change and transformation that you can use for the rest of your life.

We’ve all heard stories of people who’ve experienced seemingly miraculous recoveries from illness, but can the same thing happen for our world? According to pioneering biologist Bruce H. Lipton, it’s not only possible, it’s already occurring. In Spontaneous Evolution, this world-renowned expert in the emerging science of epigenetics reveals how our changing understanding of biology will help us navigate this turbulent period in our planet’s history and how each of us can participate in this global shift. In collaboration with political philosopher Steve Bhaerman, Dr. Lipton invites readers to reconsider:
• the "unquestionable" pillars of biology, including random evolution, survival of the fittest, and the role of DNA; • the relationship between mind and matter; • how our beliefs about nature and human nature shape our politics, culture, and individual lives; and • how each of us can become planetary "stem cells" supporting the health and growth of our world. By questioning the old beliefs that got us to where we are today and keep us stuck in the status quo, we can trigger the spontaneous evolution of our species that will usher in a brighter future.

Discover the secret to manifesting and maintaining the Honeymoon Effect—a state of bliss, passion, energy, and health in the early stages of a great love—throughout your entire life. Think back on the most spectacular love affair of your life—the Big One that toppled you head over heels. For most, it was a time of heartfelt bliss, robust health, and abundant energy. Life was so beautiful that you couldn’t wait to bound out of bed in the morning to experience more Heaven on Earth. It was the Honeymoon Effect that was to last forever. Unfortunately for most, the Honeymoon Effect is frequently short lived.

Imagine what your planetary experience would be like if you could maintain the Honeymoon Effect throughout your whole life. Bruce H. Lipton, Ph.D., best-selling author of The Biology of Belief, describes how the Honeymoon Effect was not a chance event or a coincidence, but a personal creation. This book reveals how we manifest the Honeymoon Effect and the reasons why we lose it. This knowledge empowers readers to create the honeymoon experience again, this time in a way that ensures a happily-ever-after relationship that even a Hollywood producer would love. With authority, eloquence, and an easy-to-read style, Lipton covers the influence of quantum physics (good vibrations), biochemistry (love
potions), and psychology (the conscious and subconscious minds) in creating and sustaining juicy loving relationships. He also asserts that if we use the fifty trillion cells that live harmoniously in every healthy human body as a model, we can create not just honeymoon relationships for couples but also a “super organism” called humanity that can heal our planet.

It's time for the way we think about our families, our schools, and our lives to evolve. This passionate and provocative critique of the way we raise our children and undermine our society's future delineates the ways in which we thart our creative progress, and reveals a new landscape of possibilities for the next step in human evolution. Brilliantly synthesizing twenty years of research into human intelligence, Joseph Chilton Pearce -- author of the bestsellers The Crack in the Cosmic Egg and Magical Child -- show how: • contemporary childbirth and daycare create a dangerous sense of alienation from the surrounding world • TV impedes vital neurological development • synthetic hormones in our foods foster premature sexual development, increasing the likelihood of pregnancy and rape • premature schooling contributes to potentially explosive frustration and rebellion These everyday aspects of modern life have a cumulative effect, contributing to violence, child suicide, and deteriorating family and social structures. Proposing crucial yet simple solutions, Pearce persuasively argues that we have the power to get out of our own way and unleash, instead, our "unlimited", awesome, and unknown" human potential as the culmination of three billion years of evolution.
A groundbreaking argument for why alien life will evolve to be much like life here on Earth. We are all familiar with the popular idea of strange alien life wildly different from life on earth inhabiting other planets. Maybe it's made of silicon! Maybe it has wheels! Or maybe it doesn't. In The Equations of Life, biologist Charles S. Cockell makes the forceful argument that the laws of physics narrowly constrain how life can evolve, making evolution's outcomes predictable. If we were to find on a distant planet something very much like a lady bug eating something like an aphid, we shouldn't be surprised. The forms of life are guided by a limited set of rules, and as a result, there is a narrow set of solutions to the challenges of existence. A remarkable scientific contribution breathing new life into Darwin's theory of evolution, The Equations of Life makes a radical argument about what life can--and can't--be.

* Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. By reading this summary, you will discover that your environment and way of thinking can act on your genetic code and modify your metabolism. You will also discover: that life is not the result of a struggle but of a collaboration between cells; that each cell of a living organism is a being in its own right; that the environment influences the reaction of a cell more than its DNA; that the way you perceive the world affects your health; that the energetic force of your mind and beliefs has the power to correct your genetic code. The discovery of DNA has led scientists to consider that an individual is permanently programmed by his or her genetic code. On the contrary, epigenetics, a branch of biology that studies the mechanisms modifying the activity of genes, shows that a human being is capable of intervening on his own biology. Your environment, more than your genes, influences your metabolism. Thus, early childhood experiences, traumas, but also the mental mechanisms that you have been taught act on your health. You then have the power to free yourself from your genetic coding.
